Ligne St Barth

Immerse yourself in the quintessence of tropical flora: feel on the skin the refinement of a skincare line inspired by scented flowers, exotic fruits and the sweetness of Caribbean living.

For more than three decades, **Ligne St Barth** has endeavored to combine in harmony the traditional knowledge of plants with scientific advances to create new incomparable formulas - as innovative as they are timeless, carefully adapted to the needs of the skin and to modern life.

Dr. Barbara Sturm

Dr. Barbara Sturm is a German aesthetics doctor, widely renowned for her anti-inflammatory philosophy and her non-surgical anti-aging skin treatments.

At **Dr. Barbara Sturm**, the team's ethos represents the credibility of innovation without the use of toxic, harmful or aggressive ingredients in our products.

“We use advanced science ingredients that are healthy, healing and safe, nurturing rather than attacking living skin.”

Our philosophy of skin healing also means we do not use substances and ingredients that are both unnecessary for the skin and may promote inflammation, including artificial fragrance, color, micro plastics and aggressive preservatives.

Renata França

Thousands of women around the world have seen their lives transformed and are now applying its exclusive methods of drainage lymphatic and sculpting massage.

“I try to boost my clients' self-esteem not only with massages but also by working on the importance of healthy living.”

Renata França method lymphatic drainage consists of draining the body in its entirety: the lower limbs, the abdomen, the upper limbs and the back.

This technique reduces edema, activates blood circulation and potentiates a complex network of vessels where body fluids circulate, combating cellulite in particular.

The results are immediate and evolve within 72 hours of the session. Renata's contouring is a massage whose main characteristic is the application of vigorous, rapid and firm movements all over the body. This massage has surprising results because it has been designed to shape the adipocytes, that is to say, to move the fat to the right place and thus give more contour to the body.

Kneading, pinching and sliding are some of the maneuvers that promise to give new shapes to the body and guarantee a curvier silhouette.

What is Reformer Pilates ?

Founded in 1920 by Joseph Pilates in New York, the Pilates method is now widely used throughout the world.

This German, living in England, passionate about anatomy, has created a large repertoire of movements with the aim of gently working the posture, the muscles and the mobility.

From the beginning of its creation, the discipline takes shape under the name of "Contrology" and is practiced on devices: the Reformer, the Cadillac, the Wunda Chair, etc.

This is how the Pilates Reformer was born, which was then widely developed in the United States. This machine for muscle strengthening consists of a sliding bench called a cart, equipped with springs, bars and straps.
